

Chatchai Suthapakti
CIO | CTO | Head of IT | Digital Transformation Leader
Mobile: +66 (0) 81-8090-377 E-mail: c.kiss77@gmail.com

✳ PERSONAL SUMMARY

Technology Leader with 20+ years of experience specializing in digital transformation and AI adoption. Accomplished in modernizing large-scale infrastructure and implementing data intelligence platforms to empower executive decision-making. Proven ability to lead cross-functional teams and deliver secure, high-availability systems that align with global standards and business goals.

📖 EDUCATION

2016 – 2018 Master of Information Technology and Management (International Program), Assumption University
2000 - 2005 Bachelor of Control Engineering, King Mongkut's Institute of Technology Ladkrabang (KMIT'L)
1995 - 2000 High school (Math – Science), Satriwitthaya 2 School

📖 TOEIC

Total score = 700 (Listening = 400, Reading = 300)

🏆 AWARD

CIO75 ASEAN Awards 2021

🌐 ASSOCIATION

Chapter Vice President of **Thailand Chief Information Officer Association (TCIOA)**

🚀 AREA OF EXPERTISE

- Comprehensive end-to-end IT leadership, encompassing strategic Technology Roadmap development, IT Budgeting & Cost Optimization, and robust Data Governance & Cybersecurity frameworks.
- Specialized in Infrastructure & Network, designing and modernizing enterprise-grade infrastructure, including nationwide network renovations, Cloud migrations, and the implementation of DRP/BCP
- Lead diverse teams of up to 80 members (Software, Infrastructure, and Security) using Agile and Result-Based methodologies to deliver projects on a "Commitment-Basis" aligned with corporate KPIs.
- Expert in deploying modern technologies at scale including AI, Low-Code, and RPA to enhance operational efficiency and establish a sustainable competitive advantage.
- Implementing Agile Methodologies and CMMI standards to optimize software development lifecycles.
- Experienced deploying AI models for operational excellence.
- Specialize in transforming legacy operations into high-speed digital workspace.
- Architect of visualization platforms that empower executive decision-making.
- Experienced in managing high availability of critical infrastructure.
- Aligning security strategies with global cybersecurity standards.
- Proficient in English with experience collaborating with international Boards of Directors (e.g., German COO) and managing multi-national teams. Fully equipped to drive technology strategies for international operations.

EMPLOYMENT HISTORY

Thairung Partners Group Co.,Ltd

Jan 2025 – May 2026

Business Type	Automotive
System Capacity	~1000+ Internal Users.
Position	Chief Information Officer (CIO)

Responsibility

1. Define and execute the company's technology vision, driving business growth through innovation.

6. Implement of CCTV surveillance system for all areas of TOA complex.
7. Achieved in IT infrastructure management with 99.9% uptime

Responsibility

1. Provide & manage IT infrastructure in 11 branches in Thailand and 13 oversea branches in 7 countries.
2. Design, implement and manage wireless network systems to cover all significant operation areas.
3. Manage & monitor resources in data center.
4. Manage network policy passes through VPN site to site tunnel created by firewall to support oversea branches.
5. Control backup system configuration and MA of all IT equipment.

Key achievements

1. Design & provide IT infrastructure with experiencing in 3 branches in Thailand and 13 oversea branches
 - TOA Paint (Vietnam) Co., Ltd (3 Branches)
 - TOA Paint (Laos) Co., Ltd (2 Branches)
 - TOA Paint (India) Co., Ltd (2 Branches)
 - TOA Paint (Cambodia) Co., Ltd (1 Branch)
 - TOA Paint (Malaysia) Co., Ltd (2 Branches)
 - TOA Paint (Indonesia) Co., Ltd (2 Branches)
 - TOA Paint (Myanmar) Co., Ltd (1 Branch)
2. Design & implementation of IP phone & VDO conference system to enhance communication systems.
3. Design and deploy the specification of firewall with logging system 18 units for all branches in Thailand and oversea.
4. Design & implement new enterprise wireless network system for all of TOA campus.

Responsibility

1. Design and manage internal network with redundancy concept (Cisco switch & router).
2. Design and manage domestic WAN link with redundancy concept.
3. Design and deploy IP systems for all network branches.
4. Design & plan entire of system continuity.
5. Design and manage for proactive network monitoring and alert system by Cacti.

Key achievements

1. Traffic flow design by separate internet & production routing.
2. System monitoring design via Cacti.
3. Design link connection between HQ & branch office by MPLS with 0% downtime requirement (WAN Link).
4. Network infrastructure design & security of switch, router WAN/LAN/VPN, firewall.
5. Deploy system infrastructure e.g. VM-ESX server, Active directory, File sharing, DHCP, IP phone systems.

Shrewsbury International School **Nov 2005 – Oct 2006**

Business Kind

International School

System Capacity

~400 Internal Users.

Position

Computer network administrator

Responsibility

1. Support user 1300+ users with 400+ clients
2. Manage A/D, GPO, Print server, WSUS, VPN, network and wireless system
3. Manage e-mail system by MS-Exchange
4. Administrator of Sophos Anti-virus
5. Work in English speaking environment

Key achievement

1. Maintain 99.9% uptime of entire IT system.
2. Support business users to ensure all IT systems & client devices run in normal state.
3. Software license management control.
